

ShadeView Extreme

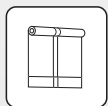

ShadeView Extreme as the name suggests this outdoor fabric has gone to the extreme; this unique fabric has been developed to provide you with clarity and protection from the elements. Black mesh is easier to see through, however black doesn't complement all exterior colour ranges. ShadeView Extreme is a fabric that has been designed with this in mind with one side black for clarity and view and the other side in a range of fashion colours to suit your home.

Shade View Extreme has been designed to combat the environments harsh elements through its unique broken twill weave, giving it greater attributes than any other mesh on the market, while still providing quality and style.

Shade Elements – Shade Without Compromise.
